

YUVRAJ AARGADE

Full-Stack Developer | AI-Integrated Systems | Flutter & Firebase | React

+91 8261074512 yuvii9552@gmail.com linkedin.com/in/yuvrajaargade github.com/Yuvraj-Aargade-8261
Chhatrapati Sambhajnagar, Maharashtra

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on expertise in building scalable web, cross-platform mobile (Flutter), and native Android applications. Proficient in designing RESTful APIs with Node.js/Express and Prisma ORM, building React SPAs and Flutter apps with Firebase (Auth, Firestore, Realtime DB), integrating AI/ML pipelines (Keras, Gemini API, TensorFlow Lite, Google Cloud AI), and implementing role-based architectures with JWT/RBAC. Demonstrated ability to engineer AI-powered clinical decision support systems, multilingual telemedicine platforms, geofencing-based automation, and real-time donor-requester matching platforms. Passionate about clean architecture, cloud-deployed solutions (Supabase, Firebase, Vercel, Railway), and delivering production-ready applications.

EDUCATION

Bachelor of Science in Computer Science	2023 – 2026 (Expected)
<i>Marathwada Institute of Technology, Chhatrapati Sambhajnagar, Maharashtra</i>	
Higher Secondary Certificate (12th Standard)	2022 – 2023
Percentage: 58%	
Secondary School Certificate (10th Standard)	2020 – 2021
Percentage: 92%	

TECHNICAL SKILLS

Languages	JavaScript, Python, Java, TypeScript, Dart, HTML, CSS, SQL
Frameworks & Libraries	React.js, Node.js, Express.js, Flutter, Prisma ORM, TensorFlow/Keras, TensorFlow Lite, Framer Motion, Provider, GoRouter, Angular
Cloud & DevOps	Supabase, Firebase, Google Cloud (Translation, Speech, AI), Vercel, Railway, Docker, AWS, GCP, CI/CD Pipelines
Development	RESTful API Design, JWT Authentication, RBAC, OOP, DSA, Agile/Scrum
AI & Machine Learning	BiGRU+CNN Models, Gemini API, Prompt Engineering, NLP, LLMs, Data Preprocessing
Tools & Databases	PostgreSQL, MongoDB, MySQL, Git, GitHub, Docker, VS Code, Android Studio

PROJECTS

Hospital Management System — AI-Powered Clinical Decision Support Platform

JavaScript · Node.js · Express.js · Prisma ORM · PostgreSQL (Supabase) · TensorFlow/Keras · Gemini 2.0 Flash · JWT · Vercel · Railway

- Engineered a full-stack hospital management platform with **4 role-based dashboards** (Admin, Doctor, Receptionist, Patient) secured by JWT authentication and RBAC across **69+ source files**.
- Developed an **AI disease prediction pipeline** using a custom BiGRU+CNN+Attention Keras model trained on **151 diseases**, enhanced with Google Gemini 2.0 Flash API for clinical reasoning, medication suggestions, and ICD-10 coding.
- Architected a comprehensive backend with **12 Prisma data models** and **30+ RESTful API endpoints** covering hospital management, ward/bed allocation, billing/invoicing with GST, and PDF prescription generation.
- Deployed on **Vercel + Railway** with Docker containerization, Supabase PostgreSQL connection pooling, and production-grade error handling.

TrackEasy — Automatic Geolocation-Based Attendance Tracking Application

Java · Android SDK · Firebase (Auth + Realtime DB) · Google Play Services Location · Material Design 3 · Retrofit · MPAndroidChart

- Engineered a native Android attendance system leveraging **Geofencing API** for automatic employee check-in/check-out with **95% tracking accuracy**.
- Architected a dual-interface system with **Admin and Employee portals** — biometric auth (fingerprint), attendance analytics (MPAndroidChart), payroll PDF generation, and shift scheduling.
- Implemented background location tracking with **optimized battery consumption**, location jump detection, and foreground service management across **67+ Java source files**.

PROJECTS (CONTINUED)

Blood Bank & Donor Management System — Real-Time Donor-Requester Platform

React.js · Vite · Firebase (Auth + Firestore) · Framer Motion · React Router v6 · React Icons · Vanilla CSS

- ▶ Built a full-stack blood bank platform with **2 role-based dashboards** (Donor & Requester) featuring Firebase Authentication, Firestore CRUD operations, and privacy-controlled contact reveal across **44+ source files**.
- ▶ Developed a **smart donor search engine** with multi-filter matching (blood group, city, area), real-time request workflow (send/approve/decline), and duplicate request prevention with Firestore compound queries.
- ▶ Engineered a responsive, animated UI with **Framer Motion** transitions, animated counters, interactive FAQ accordion, blood group compatibility guide, testimonials carousel, and eligibility checker — deployed on **Firebase Hosting**.

ApnaClinic — AI-Powered Multilingual Telemedicine Platform for Rural Healthcare

Flutter · Dart · Firebase (Auth + Firestore + Realtime DB) · Google Cloud AI · TensorFlow Lite · Google Cloud Translation · Speech-to-Text/TTS · Provider · GoRouter

- ▶ Engineered a cross-platform telemedicine app with **3 role-based dashboards** (Patient, Doctor, Pharmacy) featuring OTP authentication, biometric login, and appointment/prescription/billing management across **90+ Dart source files**.
- ▶ Built an **AI-powered symptom checker** with Google Cloud AI and TensorFlow Lite on-device models, integrating an interactive body map, voice input, disease prediction, risk assessment, and treatment recommendations.
- ▶ Implemented **4-language multilingual support** (English, Hindi, Marathi, Punjabi) with Google Cloud Translation API, real-time speech-to-text/text-to-speech pipeline, and WebRTC-based video consultations for telemedicine.

KEY ACHIEVEMENTS

- ★ **SIH 2024 Grand Finalist** — Selected for the **Smart India Hackathon 2024** Grand Finale at NIT Srinagar for the Geolocation-Based Attendance Tracking System, a problem statement given by **GAIL (Ministry of Petroleum & Natural Gas)**.
- ★ Built an **AI-powered clinical decision support system** predicting **151 diseases** using BiGRU+CNN+Attention deep learning model with Gemini API enhancement.
- ★ Designed and deployed a **multi-role hospital platform** with 12 database models, 30+ API endpoints, and 4 role-based dashboards on Vercel + Railway + Docker.
- ★ Achieved **95% attendance tracking accuracy** in TrackEasy through geofencing-based automation, eliminating manual processes across **67+ Java classes**.
- ★ Developed a **real-time blood donation platform** with React + Firebase, implementing privacy-controlled donor matching, role-based dashboards, and smart search across **44+ source files**.
- ★ Built a **multilingual telemedicine platform** (ApnaClinic) in Flutter with AI symptom checker, 4-language voice support, 3 role-based dashboards, and WebRTC consultations across **90+ Dart files**.

ADDITIONAL INFORMATION

- **Methodologies:** Agile, Scrum, TDD
 - **Interests:** AI/ML Research, Open Source
- **Languages:** English, Hindi, Marathi
 - **Soft Skills:** Problem Solving, Team Work

PERSONAL DETAILS

Full Name	Yuvraj Sainath Aargade
Date of Birth	16/03/2005
Marital Status	Unmarried
Hobbies	Competitive Programming, Building Side Projects, Exploring New Tech Stacks, Open Source Contribution, Playing Cricket

DECLARATION

I hereby declare that all the information provided above is true to the best of my knowledge and belief. I take full responsibility for the correctness of the above-mentioned details.

Yuvraj Sainath Aargade
